TV3500

Lightweight wireless TV listener with powerful sound and an out-of-box solution for an immediate and easy connection without cable

- **Maximum comfort** thanks to a lightweight TV listener (61gr) and orientable extra-soft earbuds for hours of listening
- **Immediate and super easy connection without cable**, thanks to a built-in base microphone that captures the sound of the TV or the Hifi. **OR: connection with optical audio cable (TOSLINK) or audio cable (Jack 3.5mm)** for high definition stereo sound (cables supplied)
- **Loud volume (up to 125dB)** and R/L balance adjustment with remote control. **Ideal for seniors and hearing impaired.**
- **4 sound profiles** to choose the quality sound that suits you best
- **Advanced technology to enhance voices and reduce TV background noise**
- **Microphone key** to join conversations around you at the press of a button

Up to 125dB

TV3500

Charging base

- **TV listener charging base with built-in mic and remote control support**
- Power LED indicator on charging base
- Audio input LED indicator: 1= optical input/TOSLINK - 2= analog input - 3=Microphone
- Battery low LED indicator

Audio

- **Adjustable powerful volume: up to 125dB**
- **Infrared remote control** for easy volume and R/L balance adjustments thanks to + and – buttons, and for sound profile selection with EQ equalizer button
- **Equalizer with 4 audio profiles available:**
flat / bass boost / treble boost / enhanced voices with TV background noise reduction
- **3 ways to connect the base to the audio source:**
- 1 very easy mode without cable (mono sound), using the TV3500 mic on the base, to capture the sound of the audio source (TV, Hifi).
And 2 modes with cable (stereo sound):
- Analog audio cable with jack plugs (incl.)
- Optical TOSLINK audio cable (incl.) for a higher sound quality
- **Headphones tilt up, down and sideways** to best fit the user anatomy and improve the sound quality
- Low battery beep alarm

Specific Functions

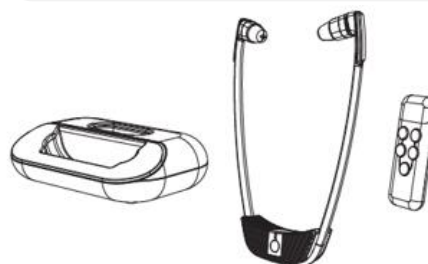

- LED indicator on headset for charging/power on/off
- **Microphone button** on the headset to cut TV sound and listen to ambient noises or join a conversation. The environment sound is then directly captured by the headset mic and amplified into your ears.
- Microphone button enables headset power on/off
- **Energy saving:** the headset automatically switches to standby mode when no signal is detected for about 5 minutes.

Technical Specifications

- Interference free numerical DECT technology (1.8 - 1.9 GHz)
- Maximum output power (NTP) : 24dBm
- Range between base and headset : up to 30m
- **Headset equipped with rubber earbuds size « S »**
- **1 additional pair of rubber earbuds size « L » included**
- Base mains power supply : 5VDC, 550mA
- Headset rechargeable battery : 3,7 V, 450 mA Li-Po
- Operating time with fully charged battery : up to 6 hours
- Charging time for empty battery : approx. 2.5 hours
- Remote control works with 2X AAA batteries (incl.)
- Optical TOSLINK digital audio cable (incl.)
- Analog audio cable both ends with 3.5 mm jack stereo plug (incl.)
- Headset weight: 61g / Base weight: 150g
