

The LH10 is an amplified hearing assistant equipped with a built-in high-sensitivity microphone which amplifies the ambient sound, allowing an hearing-impaired person to listen and take part in a conversation. In the T position, the LH10 works as a receiver that captures the magnetic fields generated by the induction loops (located in some movie theatres or conference rooms) and reproduce them as an audible signal.

FEATURES

- Amplified hearing assistant
- Adjustable receiving volume control : up to 30dB
- Tone control : +/- 10dB
- Left/right Balance control
- Super sensitive built in microphone
- UV coating to prevent case noise

TECHNICAL SPECIFICATIONS

- Up to 120 dBspl Max acoustic output
- Frequency range : 100 to 8000Hz
- Built in Lithium battery
- Operating time 8 - 10 hours
- Low battery indicator
- Full charging time: 2/3 hours
- Telecoil sensitivity: -50dBv, 1Khz, 100mA/m
- 2,5mm jack input for external microphone (optional)
- Size :5.7 x 2.7 x 10 cm

INCLUDED ACCESSORIES

- USB Charging Cable (5Vdc)
- Earphones (with stereo jack 3,5mm)
